

Planning to dig or excavate?

Before beginning a project, make sure you call 811, the nationwide number for line locating.

Damage to *any* underground utility lines can create a potentially dangerous situation, but contact with electric facilities can result in serious and even fatal injuries.

It is your responsibility to inform the Palmetto Utility Protection Services (PUPS) at least three business days in advance before diggings begins. PUPS will notify a line locating service to mark all underground utility lines with color-coded paint.

Duke Energy electric lines will be marked in red. When digging, PUPS suggests staying a minimum of 30 inches outside the marking.

Please be aware that customer-owned service lines (irrigation, landscape lighting, etc.) may or may not be marked and are the home owner's responsibility.

When you call 811 or 888-721-7877, be prepared to provide the following information:

- Your name or the name of the person digging, as well as contact phone number(s).
- The address or lot number where digging or excavating will be performed.
- Directions to the property, including the county and/or township.
- For e-dig requests and state specific dig laws, please visit: www.sc1pups.org.

Emergency locates are available 24 hours, seven days a week.
