

**The future is in
all of our hands.**

**With Duke Energy's GoGreen
Kentucky we can make it better.**

Duke Energy is excited to offer you a new program that gives you the opportunity to take an active part in preserving the environment for future generations while greening your home's energy usage.

With Duke Energy's GoGreen Kentucky, you can purchase the attributes of energy generated from renewable, environmentally friendly sources such as wind, hydroelectric or solar.

How you can help.

As a participant in Duke Energy's GoGreen Kentucky program, you can purchase the

minimum of two (2) 100 kilowatt-hour (kWh) blocks of green power for only \$4 a month, which is added to your energy bill. Beyond this minimum, you can purchase additional 100 kWh blocks of green power for \$2 a month.

The average Kentucky customer home uses 1,000 kWh per month. Green energy costs more to produce so this program offers a simple and inexpensive way for you to green your home's energy usage. Your contribution, along with others in Kentucky, collectively make a difference by supporting regional Green-e certified wind projects.

The benefits of Duke Energy's GoGreen Kentucky.

- Green your home's energy usage.
- Advances development of renewable, environmentally friendly energy sources.
- Diversifies energy supply and lessens demand for fossil fuel generation.

Make a difference right now.

Sign up for Duke Energy's GoGreen Kentucky program today and, for as little as \$4 a month, you can help make a difference with the environment and further renewable energy. Sign up online at www.duke-energy.com/gogreen or call **1.800.423.5401**.
