Online Energy Tools

Our Home Energy Calculator and Appliance Calculator provide an interactive experience that takes just a few minutes to complete.

- **Home Energy Calculator** provides estimated energy savings if you were to upgrade your heating or cooling systems, add insulation or make other energy improvements.
- **Appliance Calculator** estimates the average cost to run the major appliances in your home.

Low-Cost, High-Value Efficiency Measures

- Clean or replace your furnace filter monthly.
- Seal air leaks around doors and windows with caulk and weather stripping.
- Seal ductwork seams and joints with duct sealing compound and wrap with insulation, if needed.
- Replace standard light bulbs with compact fluorescent bulbs that use up to 75 percent less energy and last up to 10 times longer.
- Set your thermostat to the lowest comfortable setting. Each degree may save as much as 3 percent.
