

**SECTION XIV  
METER DATA MANAGEMENT**

14.1. Meter Data Collection

The Company, acting as the designated Meter Data Management Agent for the Certified Supplier, will supply hourly load data to Transmission Provider, for the Certified Supplier. The Company will provide this data in accordance with the OATT, including estimates when necessary. The Company will be held harmless for any actions taken while performing Meter Data Management Agent responsibilities. Meter data collected by the Company shall be used to calculate the quantity of energy actually consumed by a Certified Supplier's End-use Customers for a particular period. Such collection shall occur at the time of an End-use Customer's monthly meter read. Thus, in order to measure the energy consumed by all End-use Customers on a particular day, at least one month is required for data collection. Typically, the Company is able to calculate and provide hourly usage data for a Certified Supplier's load, for a calendar month, forty-five to sixty days after the end of that calendar month. It is the responsibility of the Certified Supplier to understand this process.

14.2. Monthly-Metered End-use Customers

Data from Monthly-Metered End-use Customers is collected in subsets corresponding to End-use Customer Billing Cycles, which close on different days of the month. The Company shall convert such meter data, including estimates, for End-use Customers to the equivalent hourly usage. Metered usage will be applied to customer segment load curves to derive an estimate for the hour-by-hour usage.

14.3. Interval-Metered End-use Customers

Data from Interval Metered End-use Customers will also be collected monthly by the Company on a Billing Cycle basis.
