

Duke Energy's regulated coal-burning power plants provide much of the electricity used by the company's customers in the Carolinas and Midwest. To help meet peak energy demand, the company also operates oil and natural gas-burning turbine units. The combined generating capacity of these facilities is approximately 19,000 megawatts.

## Coal-Fired Generating Stations:

### Allen Steam Station

- Capacity: 1,140 megawatts
- Location: Gaston County, N.C.
- Commercial Date: 1957

### Belews Creek Steam Station

- Capacity: 2,240 megawatts
- Location: Stokes County, N.C.
- Commercial Date: 1974

### Buck Steam Station

- Capacity: 369 megawatts
- Location: Rowan County, N.C.
- Commercial Date: 1926

### Cayuga Station

- Capacity: 1,104 megawatts
- Location: Vermillion County, Ind.
- Commercial Date: 1970

### Cliffside Steam Station

- Capacity: 760 megawatts
- Location: Cleveland and Rutherford counties, N.C.
- Commercial Date: 1940

### Dan River Steam Station

- Capacity: 276 megawatts
- Location: Rockingham County, N.C.
- Commercial Date: 1949

### East Bend Station

- Capacity: 650 megawatts
- Location: Boone County, Ky.
- Commercial Date: 1981

### Edwardsport Station

- Capacity: 160 megawatts
- Location: Knox County, Ind.
- Commercial Date: 1918

### Gallagher Station

- Capacity: 560 megawatts
- Location: Floyd County, Ind.
- Commercial Date: 1958

### Gibson Station

- Capacity: 3,145 megawatts
- Location: Gibson County, Ind.
- Commercial Date: 1976

### Lee Steam Station

- Capacity: 370 megawatts
- Location: Anderson County, S.C.
- Commercial Date: 1951

### Marshall Steam Station

- Capacity: 2,090 megawatts
- Location: Catawba County, N.C.
- Commercial Date: 1965

#### Riverbend Steam Station

- Capacity: 454 megawatts
- Location: Gaston County, N.C.
- Commercial Date: 1929

#### Wabash River Station

- Capacity: 668 megawatts
- Location: Vigo County, Ind.
- Commercial Date: 1953

#### Oil / Gas-Fired Generating Stations:

##### Connersville Peaking Station

- Capacity: 98 megawatts
- Location: Fayette County, Ind.
- Commercial Date: 1972

##### Mill Creek Combustion Turbine Station

- Capacity: 640 megawatts
- Location: Cherokee County, S.C.
- Commercial Date: 2003

##### Henry County Peaking Station

- Capacity: 129 megawatts
- Location: Henry County, Ind.
- Commercial Date: 2001

##### Noblesville Station

- Capacity: 300 megawatts
- Location: Hamilton County, Ind.
- Commercial Date: 1950

##### Lincoln Combustion Turbine Station

- Capacity: 1,200 megawatts
- Location: Lincoln County, N.C.
- Commercial Date: 1995

##### Wheatland Peaking Station

- Capacity: 480 megawatts
- Location: Knox County, Ind.
- Commercial Date: 2000

##### Madison Peaking Station

- Capacity: 677 megawatts
- Location: Butler County, Ohio
- Commercial Date: 2000

##### Woodsdale Station

- Capacity: 504 megawatts
- Location: Butler County, Ohio
- Commercial Date: 1992

##### Miami-Wabash Peaking Station

- Capacity: 104 megawatts
- Location: Wabash County, Ind.
- Commercial Date: 1968

#### Other Combustion Turbine Stations

In addition to the Lincoln Combustion Turbine Station and Mill Creek Combustion Turbine Station, Duke Energy has 23 individual combustion turbine units in the Carolinas, totaling 584 megawatts, in five locations. Four of the sites are existing coal-fired stations. A coal-fired station existed at the fifth site – Buzzard Roost – until 1974.

Station	Units	Capacity (Megawatts)	Commercial Operation
Buck	3	93	1970
Buzzard Roost	10	196	1971
Dan River	3	85	1968
Lee	3	90	1968
Riverbend	4	120	1969
