

# Duke Energy Fast Facts

Headquartered in Charlotte, N.C., Duke Energy Corporation is one of the largest electric power holding companies in the United States. A Fortune 500 company, Duke Energy is listed on the New York Stock Exchange under the symbol DUK. More information about Duke Energy can be found at: [www.duke-energy.com](http://www.duke-energy.com).

**2010 Operating Revenues** – \$14.3 billion (for year ended Dec. 31, 2010)  
**Total Assets** – \$59 billion (as of Dec. 31, 2010)  
**Employees** – Approximately 18,440 (as of Dec. 31, 2010)  
**Total U.S. Generating Capacity** – Approximately 35,400 megawatts (owned capacity)

## OPERATING SEGMENTS

### U.S. Franchised Electric and Gas:

With approximately 27,000 megawatts of owned regulated generation capacity, U. S. Franchised Electric and Gas is the largest business segment and primary source of earnings growth.

**States Served** – North Carolina, South Carolina, Ohio, Kentucky, Indiana

**Size of Service Territory** – Approximately 50,000 square miles

**Total Transmission Lines** – Approximately 21,000 miles

**Total Distribution Lines** – Approximately 152,200 miles

**Total Gas Mains** – Approximately 7,200 miles

**Total Gas Service Lines** – Approximately 6,000 miles

### Utility Customers:\*

**Total Electric** – Approximately 4 million

**Duke Energy Carolinas** – Approximately 2.4 million

**Duke Energy Ohio** – Approximately 685,000 (Transmission and Distribution)

**Duke Energy Indiana** – Approximately 790,000

**Duke Energy Kentucky** – Approximately 135,000

**Total Gas** – Approximately 500,000

**Duke Energy Ohio** – Approximately 400,000

**Duke Energy Kentucky** – Approximately 100,000

\* Actual as of Dec. 31, 2010.

### Commercial Power:

Commercial Power's assets, excluding wind and solar energy generation assets, are composed of approximately 7,550 net MW of power generation primarily located in the Midwestern United States. Commercial Power also has a retail sales subsidiary, Duke Energy Retail.

Duke Energy Retail is certified by the Public Utilities Commission of Ohio (PUCO) as a Competitive Retail Electric Supplier (CRES) provider in Ohio. Duke Energy Retail serves retail electric customers in southwest, west central and northern Ohio with energy and other energy services at competitive rates. As a result of the competitive markets in Ohio, Duke Energy Retail has focused on acquiring customers that had previously been served by Duke Energy Ohio under the Electric Security Plan (ESP), as well as those previously served by other Ohio franchised utilities.

Duke Energy Renewables is a leader in developing innovative commercial renewable energy solutions, including wind and solar projects, for customers throughout the United States. The nine wind farms Duke Energy Renewables owns in four states are capable of producing 986 MW of electricity. Duke Energy Renewables' pipeline of potential wind power projects totals approximately 5,000 MW. Duke Energy Renewables also owns 16 MW of commercial solar capacity.

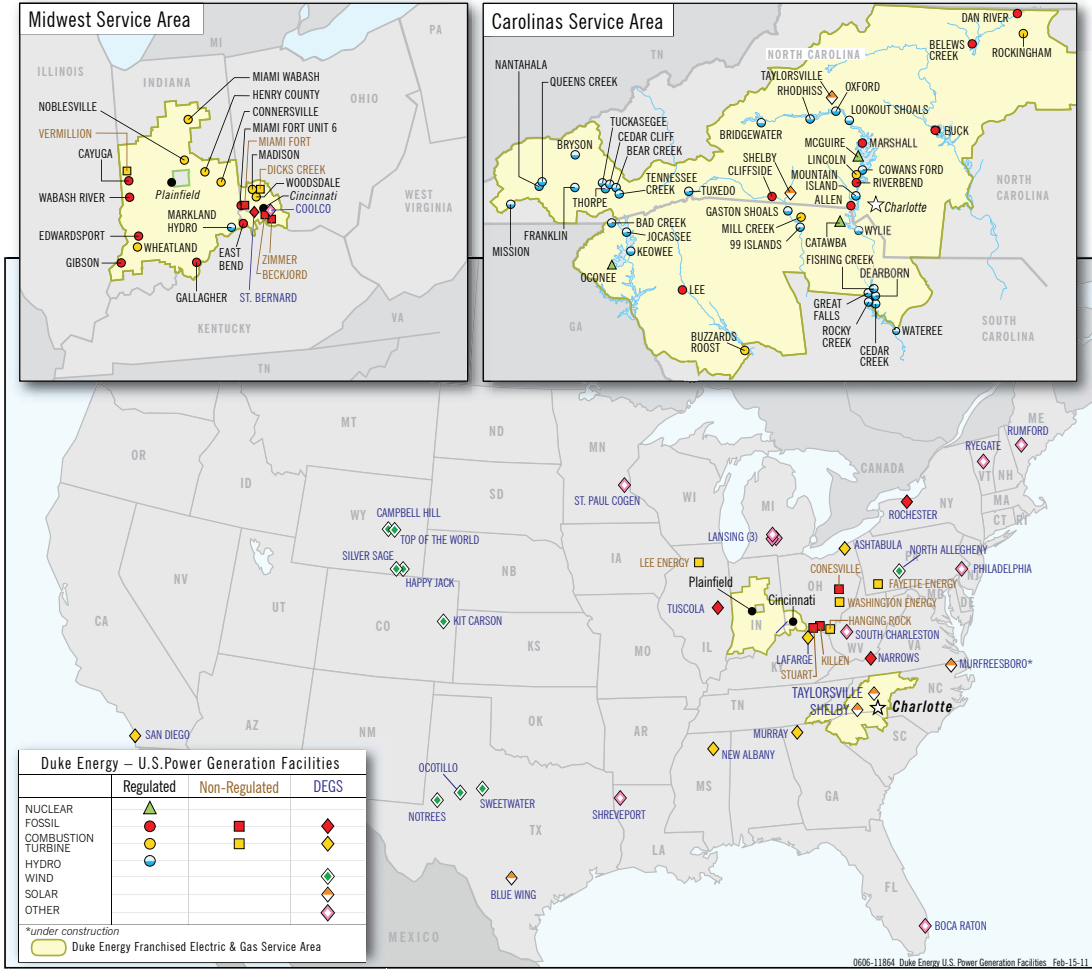

Duke Energy Generation Services (DEGS) builds, owns and operates electric generation for large energy consumers, municipalities, utilities and industrial facilities. DEGS manages 4,440 megawatts of power generation at 29 facilities in the U.S.

Through its Commercial Businesses unit, Duke Energy is also investing in commercial transmission projects to help the U.S. prepare for the energy needs of tomorrow.

## North America Power Generation Facilities:

## International Energy:

Duke Energy International (DEI) principally operates and manages power generation facilities and engages in sales and marketing of electric power, natural gas, and natural gas liquids outside the U.S. It conducts operations primarily through DEI and its affiliates and its activities principally target power generation in Latin America. Additionally, DEI owns a 25 percent interest in National Methanol Company (NMC), a large regional producer of methanol and methyl tertiary butyl ether (MTBE) located in Saudi Arabia. DEI owns, operates or has substantial interests in approximately 4,500 gross MW of generation facilities. About 70 percent of this capacity is hydroelectric, and approximately 88 percent was under contract in 2010.
