

Action: Internet Website	Prerequisite Actions: none
Action Description: Establish Internet site to provide public with relicensing information.	
Applicable Hydro Projects/Developments: All	

I. Objective

Review needs and presentation methodologies for providing desired information on relicensing.

II. Basis

The basis for this study is to enhance public availability of relicensing basics and activities.

III. Geographic and Temporal Scope

This study should begin in early 2001 to increase the potential of prototype testing of new communications processes later this year.

IV. Approach and Analysis

Self-identified members of the public, stakeholders, and others, plus other parties to be identified by the working group will define the needs and make recommendations to meet future needs.

V. Schedules and Required Conditions

The study will begin in late January 2001, subject to the availability of interested participants.

VI. Results

Results will be used to consider adopting new methodologies for informing the public regarding relicensing.

VII. Participants

	Organization	Name	Phone #	E-Mail
NP&L Lead	Duke Power	Fred Alexander	828-369-4534	Afalexan@duke-energy.com
Agency Contacts				
NP&L Supporting Consultant	Duke Power	Barbara McRae Webmaster	828-369-4525	Bamacrae@duke-energy.com
Other Participants	Friends of Lake Glennville	Keith Dixon	843-525-6665	kkdnc@yahoo.com

VIII.Expected Benefits

The study plan should lead to the creation of an improved web site for public information on hydro relicensing. This, in turn, should lead to increased public understanding and informed participation in the relicensing process.
