

Ohio, Kentucky and Indiana Planting Zones

For landscaped areas in transmission line easements – 100' easement

Inside the “Wire Zone”

Zones extend between the outermost power lines in horizontal line construction and ten feet (10') beyond the nearest power line in vertical line construction. In most instances, the Wire Zone is approximately 25 feet from the center line on both sides of the transmission tower.

Inside the “Border Zone”

Zones extend from the edge of the Wire Zone to the outside edge of the right-of-way. Border Zones are located on both sides of the rights-of-way and are each approximately 25 feet wide.

Inside the “Peripheral Zone”

Zones are adjacent to Border Zones and are each approximately 15 feet wide.
